

Doug,

You had asked if Orion could be used for a reference for Global Production Solutions, and the answer is definitely a "yes". Since our first time working with you and your company in 2010, we have had a very positive relationship. We feel the equipment you are providing us is first rate, and by far, have given us the excellent service related to your products. It is good to work with folks that realize the Oil and Gas business is a 24 hour a day operation and who handle their service replies accordingly. All personnel, from sales to field techs, handle themselves professionally and have proved to be both knowledgeable and interested in our projects. We have had the opportunity to experience a wide variety of the products and services you offer from sub pumps and drives, H-pumps, and now your automation packages.

I would be happy to discuss any of these products, your personnel, and your support for the products, with anyone.

Regards,

John W. Brown
